Project Title: Love Actually

I'd like to build this site as multiple pages with a navigation bar at the top. Each page will be divided into the categories listed below. I'd like for there to be film stills included on the pages, so a viewer can understand what it would be like to watch the movie. The purpose of this site should be to make someone curious enough to watch Love Actually.

- **Introduction** – the first two paragraphs on the wikepedia page introducing what the movie is
- **Plot** – separate sections for each storyline and an image to introduce each of them
- **Cast** – I don't think it's necessary to include everyone on the cast list just the people who play the characters listed in plot
- **Production**
- **Soundtrack** – with a side-by-side comparison of the UK and US soundtrack
- **Sources/References**
